DIGITAL FORENSICS REPORT

Multi-Modal Deepfake Analysis

REPORT METADATA

Case ID / Job	F1B73239
Analysis Date	2026-07-08 19:13:44 UTC
Target File Type	Test_Fake_Video_1080p.mp4
Frames Analyzed	16

EXECUTIVE VERDICT

LIKELY FAKE

KEY ANOMALY FACTORS (EXPLAINABLE AI)

- ! Very long feature name that might wrap Very long feature name that might wrap Very long feature name that might wrap V
- ! Another feature

1. AI META-CLASSIFIER SENSOR BREAKDOWN

Neural Network (EfficientNet-B4) Confidence	**90.00%**
Frequency Domain Anomaly	**80.00%**
Error Level Analysis (ELA) Compression	**0.00%**
Biological Geometry Anomaly	**0.00%**
Sensor Noise Fingerprint (PRNU)	**0.00%**
Chrominance Color Space Anomaly	**0.00%**
FINAL AI CONFIDENCE SCORE	**85.00%**

2. FREQUENCY & COMPRESSION ANALYSIS

Spectral Anomaly Score	0.0%
High-Frequency Energy Ratio	0.0000%

Analysis: N/A

3. BIOLOGICAL & FACIAL GEOMETRY

No face detected in the analyzed frame.

Eye & Gaze Anomaly Score	0.0%

Warnings: Blink rate extremely low; Gaze asymmetry detected. Gaze asymmetry detected. Gaze asymmetry detected. Gaze asymmetry detected. Gaze asymmetry detected.

4. SENSOR NOISE & COLOR SPACE

PRNU Noise Anomaly Score	0.0%

8. VISUAL EVIDENCE GALLERY

LEGAL DISCLAIMER

This report is generated by an automated Artificial Intelligence meta-classifier system. It should be reviewed and validated by a qualified digital forensic analyst before being admitted as evidence in legal or disciplinary proceedings. The meta-classifier synthesizes multiple independent detection vectors, but false positives and false negatives remain theoretically possible.
